

Expanding Access to Generic Drugs

9 out of 10 prescriptions filled in the United States are for generic drugs.

Most are for simple oral medications.

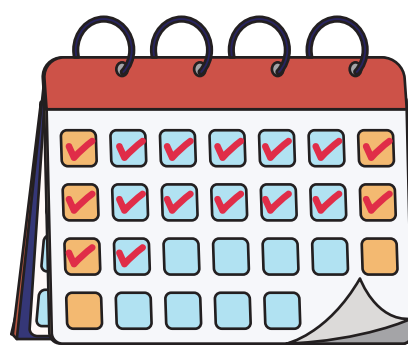

More complex generics are on the way.

Generic drugs, including complex generics, **empower patients.**

Access to **lower-cost medication**

Improved **treatment adherence**

Opportunity to **improve overall health**

Generic drugs, including complex generics, also **benefit the health care system.**

Offer **cost savings**

Improve **treatment access**

Encourage **disease management**

More options, more opportunity for patient access.
